
2-shot prompt with disjoint surface forms from test examples

Given the description after "Description:", write a true statement about all containers or boxes and their contents to the description after "Statement:".

Description: The biscotti is in Container A, the icicle is in Container B, the granite and the machine are in Container C, the folio and the encyclopedia are in Container D, the bill is in Container E, the spork and the jackknife and the frappuccino are in Container F, the clipper and the ladybug are in Container G.

Statement: Container A contains the biscotti, Container B contains the icicle, Container C contains the granite and the machine, Container D contains the folio and the encyclopedia, Container E contains the bill, Container F contains the spork and the jackknife and the frappuccino, Container G contains the clipper and the ladybug.

Description: The biscotti is in Container A, the icicle is in Container B, the granite and the machine are in Container C, the folio and the encyclopedia are in Container D, the bill is in Container E, the spork and the jackknife and the frappuccino are in Container F, the clipper and the ladybug are in Container G. Take the biscotti out of Container A. Take the folio and the encyclopedia out of container D. Place the tetrapod inside Container A. Pick up the ladybug in Container G and place it into Container C. Take the bill out of Container E. Place the gumball inside Container D.

Statement: Container A contains the tetrapod, Container B contains the icicle, Container C contains the granite and the machine and the ladybug, Container D contains the gumball, Container E contains nothing, Container F contains the spork and the jackknife and the frappuccino, Container G contains the clipper.

Description: {description}

Statement: Box 0 contains

Table 4: Prompt with 2-shot in-context demonstrations that have disjoint surface forms.

Zero-shot prompt

Given the description after "Description:", write a true statement about all boxes and their contents according to the description after "Statement:". Format the statement as Box 0 contains the A, Box 1 contains the B, Box 2 contains the C, Box 3 contains the D, Box 4 contains the E, Box 5 contains the F, Box 6 contains the G. A, B, C, D, E, F, G are placeholders for the contents of each box.

Description: {description}

Statement: Box 0 contains

Table 5: Prompt template for zero-shot experiments.

Dataset	Scenarios		Examples	
	Demonstration	Test	Demonstration	Test
Complete	1	990	14	90,090
Subsample	1	491	14	5,012
AmbiRef.	1	474	14	4,991
MoveContents	1	451	14	4,956
